DATE: 18 JULY 2025　　　　**DAY: FRIDAY**

DAY 21 — GUI Development Using Tkinter

LEARNING OBJECTIVES:-

- Build user interface for phishing detection tool.
- Integrate backend results with GUI display.

Overview:-

Day 21 introduced graphical UI development using Tkinter. An interface was created to scan emails, view results, and present warnings clearly.

Activites:-

- Created frames, buttons, and output panels.
- Connected email scanner backend to GUI.

Insights:-

- Understood GUI event handling.
- Improved user experience through structured layout.
